6.8 Build 23.0.0.226.56 (April 28, 2023)	15
6.9 Build 23.0.0.210.54-55	15
6.10 Build 23.0.0.210.53 (April 11, 2023)	15
6.11 Build 23.0.0.210.50-52	15
6.12 Build 23.0.0.210.49 (March 27, 2023)	16
6.13 Build 23.0.0.201.48 (March 17, 2023)	17
6.14 Build 23.0.0.191.46-47	18
6.15 Build 23.0.0.191.45 (March 7, 2023)	18
6.16 Build 23.0.0.191.40-44	18
6.17 Build 23.0.0.191.39 (February 23, 2023)	19
6.18 Build 23.0.0.172.32-38	19
6.19 Build 23.0.0.172.31 (February 7, 2023)	19
6.20 Build 23.0.0.162.29-30	19
6.21 Build 23.0.0.162.28 (January 27, 2023)	20
6.22 Build 23.0.0.137.19-27	21
6.23 Build 23.0.0.137.18 (January 9, 2023)	21

1 Fabasoft eGov-Suite 2023 September Release (23.9.0)

1.1 Build 23.9.0.266.11 (November 29, 2023)

eGov15950

In addition to adapting the creation of the "Personal Transactionbuffer" (DEVEXT@15.1001:transactionbuffer) in the User Environment, its use has now also been adapted so that only one finalization can take place at a time. When starting a finalization, the system now waits for the "Personal Transactionbuffer" to be released for use by the current finalization. The timeout can be configured on the Current Domain/Tenant with the property "Timeout to lock the transaction buffer property on the user environment" (DEVEXT@15.1001:transactionbufferlocktimeout). If no value is set 30000 (30 seconds) will be used

This extension allows parallel accesses that use the "Personal Transactionbuffer" to be processed better

Technical information:

- To determine the current "Personal Transactionbuffer", the action DEVEXT@15.1001:GetTransactionBuffer must be used. This action must be called on the affected user
- To determine and lock the current "Personal Transactionbuffer", the action DEVEXT@15.1001:GetAndLockTransactionBuffer must be used. This action must be called on the affected user
- To apply the current "Personal Transactionbuffer" for a transaction, the action DEVEXT@15.1001:TakeoverTransactionBufferForTransaction must be used. This action must be called on the affected user

1.2 Build 23.9.0.256.10

Internal build

1.3 Build 23.9.0.256.9 (November 13, 2023)

eGov15886

A check against XSS attacks has been introduced when creating the tree view in the PDF export

eGov15921

When executing ELAKTrans calls, Subfiledocuments (Layer1) can now also be sent without a File (Layer3). The empty Layer3 node is now skipped and continued with the payload it contains (Edition AUT)

eGov15898

The setting of the property "Personal Transactionbuffer" (DEVEXT@15.1001:transactionbuffer) in the User Environment has been adjusted. The attribute has been set "Lockable" and is now locked using the action DEVEXT@15.1001:LockTransactionBufferAttribute and a timeout. The timeout can be configured on the Current Domain/Tenant with the property "Timeout to lock the transaction buffer property on the user environment" (DEVEXT@15.1001:transactionbufferlocktimeout). If no value is set 30000 (30 seconds) will be used

This extension improves the creation of "Personal Transactionbuffer objects and the parallel access. The object is not mutually locked

eGov15757

When using the Standard Delivery (DLVDUAL@15.1001:DispatchDualApp), the Cost Center is now also taken into account as with the delivery via hpcDUAL and stored in the node "BillingToken" of the metadata. The evaluation hierarchy is defined as follows and is the same as for delivery via hpcDUAL:

- Responsible Organization
- Delivery Profile
- Domain/Tenant

(Edition AUT)

eGov15795

When processing Return Receipts from the Vendo delivery service, the following data is now read out for Hybrid Return Receipts and stored in the Return Receipt in the property "Postal Return Receipt" (FSCGOVDLV@1.1001:paperreturnreceipt):

- Abgabebereich -> Deposit Base Postal Code (FSCGOVDLV@1.1001:prdepositbasepostalcode)
- Datum -> Deposit Date (FSCGOVDLV@1.1001:prdepositdate)
- DatumFrist -> Begin Period(FSCGOVDLV@1.1001:prbeginperiod)
- Hinterlegungsort -> Delivery Deposit Message (FSCGOVDLV@1.1001:prdeliverydepositmsg)
- Abholfiliale -> Pick-up Branch (FSCGOVDLV@1.1001:prpickupbranch)

The new attribute "Pick-up Branch" (FSCGOVDLV@1.1001:prpickupbranch) has been added. In addition, the return receipt status "Delivered" is no longer used for the deposit but "Deposited" (Edition AUT)

1.4 Build 23.9.0.251.8 (October 23, 2023)

eGov15812

Fixed an error that occurred when canceling the import in Register Sheets (*Edition CCA, Edition DEU*)

eGov15873

Signature verification via Governikus Data Pavonis has been revised and now uses a temporary file for the signature verification (*Edition DEU*)

1.5 Build 23.9.0.242.7

Internal build

1.6 Build 23.9.0.242.6 (October 12, 2023)

No changes

1.7 Build 23.9.0.226.5 (October 4, 2023)

eGov15622

As of version September 2023, the use of all directory paths without restrictions is no longer possible. For security reasons, stored paths must be defined and whitelisted to be used

(Note: Additional properties and paths may exist that must be whitelisted. Error messages, indicating an error accessing directory paths may indicate additional properties that require whitelist approval)

Additional paths can be created using the kernel options CONTENTRESTRICTPATHRW for read and write and CONTENTRESTRICTPATHRO for read only

eGov15772

When a Document is inserted into a Register Sheet, the Document is no longer stored in the Register Sheet (*Edition CCA, Edition DEU, Edition CHE*)

1.8 Build 23.9.0.226.4 (September 15, 2023)

Release

2 Fabasoft eGov-Suite 2023 June Release (23.6.0)

2.1 Build 23.6.0.331.22 (November 29, 2023)

eGov15950

In addition to adapting the creation of the "Personal Transactionbuffer" (DEVEXT@15.1001:transactionbuffer) in the User Environment, its use has now also been adapted so that only one finalization can take place at a time. When starting a finalization, the system now waits for the "Personal Transactionbuffer" to be released for use by the current finalization. The timeout can be configured on the Current Domain/Tenant with the property "Timeout to lock the transaction buffer property on the user environment" (DEVEXT@15.1001:transactionbufferlocktimeout). If no value is set 30000 (30 seconds) will be used

This extension allows parallel accesses that use the "Personal Transactionbuffer" to be processed better

Technical information:

- To determine the current "Personal Transactionbuffer", the action DEVEXT@15.1001:GetTransactionBuffer must be used. This action must be called on the affected user
- To determine and lock the current "Personal Transactionbuffer", the action DEVEXT@15.1001:GetAndLockTransactionBuffer must be used. This action must be called on the affected user
- To apply the current "Personal Transactionbuffer" for a transaction, the action DEVEXT@15.1001:TakeoverTransactionBufferForTransaction must be used. This action must be called on the affected user

2.2 Build 23.6.0.331.21 (November 23, 2023)

No changes

2.3 Build 23.6.0.331.20 (November 22, 2023)

No changes

2.4 Build 23.6.0.329.19 (November 8, 2023)

eGov15898

The setting of the property "Personal Transactionbuffer" (DEVEXT@15.1001:transactionbuffer) in the User Environment has been adjusted. The attribute has been set "Lockable" and is now locked using the action DEVEXT@15.1001:LockTransactionBufferAttribute and a timeout. The timeout can be configured on the Current Domain/Tenant with the property "Timeout to lock the transaction buffer property on the user environment" (DEVEXT@15.1001:transactionbufferlocktimeout). If no value is set 30000 (30 seconds) will be used

This extension improves the creation of "Personal Transactionbuffer objects and the parallel access. The object is not mutually locked

2.5 Build 23.6.0.327.18

Internal build

2.6 Build 23.6.0.327.17 (September 1, 2023)

eGov15674

When creating Subfile Documents, a rights error could occur if there was no read access to the parent File. The problem has been fixed

2.7 Build 23.6.0.327.16 (August 25, 2023)

eGov15364

In the query against the ZMR, the amendment to the Meldegesetz has been implemented and thus the following genders are supported in the query:

- Diverse
- Inter
- Open
- Not specified

If the new ZMR service is queried without this extension, the new genders will be ignored and the gender will not be filled in Fabasoft eGov-Suite (*Edition AUT*)

eGov15625

The determination of Definitions has been improved. For example, if there is no read access on the Subject Area of a Procedure, the Definition can still be determined correctly (*Edition CCA*)

eGov15638

Fixed an error when importing eml files (*Edition CCA, Edition DEU*)

2.8 Build 23.6.0.327.15

Internal build

2.9 Build 23.6.0.327.14 (August 16, 2023)

eGov15528

A bug in the notification email has been solved. As a result, the email is displayed correctly again

eGov15369

The maximum file size of 40 MB specified by Governikus for sending to Mutli Messenger is checked during sending. An error is displayed if the file size is exceeded (*Edition DEU*)

2.10 Build 23.6.0.313.12-13

Internal builds

2.11 Build 23.6.0.313.11 (June 26, 2023)

Release

3 Fabasoft eGov-Suite 2023 April Release (23.4.0)

3.1 Build 23.4.0.229.7 (June 27, 2023)

eGov15376

A CSV migration from the properties "State" (CHPRECONFIG@1.1001:dtstate) and "Category" (CHPRECONFIG@1.1001:dcategory) to the new properties "State" (EGOVTEMPLATE@15.1001:dtstate) and "Category" (EGOVTEMPLATE@15.1001:dcategory) has been performed. This migration was not performed during the introduction of the object class "Definition" and is therefore now made up for (*Edition CHE*)

eGov15419

The properties "Login credentials for Mail-Import " (FSCVGOV@1.1001:emailcredentials) and "Path to import fileshare folder" (FSCVGOV@1.1001:fileshare) have been hidden for the end user. For security reasons, the settings may only be changed by administrators

eGov15416

If an error is thrown when generating the PDF overview, this error is no longer displayed in the overview, but the standard dialog: " Error during conversion. Please contact your system administrator.". This prevents security-related error messages from being read by the user

However, the actual error is stored on the object itself via a technical event. The administrator can then view and correct the error

eGov15395

When dispatching an Outgoing with SMTP, an error has been fixed that occurred when a document contains a "." at the end of the name

eGov15394

The content of the Workflow Notification "Activity Was Taken Over" has been restored

3.2 Build 23.4.0.229.6 (May 25, 2023)

eGov15355

Fixed a bug that caused the signature to stop working with Java 17 (*Edition CCA, Edition AUT*)

3.3 Build 23.4.0.229.5 (May 10, 2023)

eGov15038

In the Signature Client, the preconditions of the Work steps are evaluated to calculate the availability of Work steps

3.4 Build 23.4.0.228.4 (April 27, 2023)

eGov15041

Signature Client (Widget): When prescribing to another user or using a template, the respective attribute name is always shown, even if only one property is visible in the dialog. For this purpose, the parameter "alwaysshowlabel" has been added to the usecase FSCSIGNCLIENT@15.1001:SignatureClientGenericApplication (*Edition AUT*)

eGov15271

An error in the sorting control (top right) when printing files has been fixed

eGov15267

The following display errors have been corrected in the Research/Searchfolder Administration:

- If several Research orders are selected, the menu "Processing-Functions" is not available in the context menu
- If several Searchfolder Administration are selected, the menu "Processing-Functions" and the menu "Admin Functions" are not available in the context menu
- The properties "Including subordinate Subjectareas" (FSCRESEARCH@15.1001:researchcontainerderived) and "Including subordinate groups" (FSCRESEARCH@15.1001:researchgroupderived) are hidden if the property "Subjectarea" (FSCRESEARCH@15.1001:researchcontainer) or "Group" (FSCRESEARCH@15.1001:researchgroup) is not displayed

3.5 Build 23.4.0.224.3 (April 21, 2023)

Release

4 Fabasoft eGov-Suite 2023 Update Rollup 2 (23.0.2)

4.1 Build 23.0.2.30.74 (October 17, 2023)

eGov15640

The customization point for evaluating the Workflow Participant with the former trigger "Returnreceipt: Workflow user" (FSCGOVDLV@1.1001:CtxDeliveryResponseWFUser) for return receipt processing now does not return a User (COOSYSTEM@1.1:User) but a Compound Type COOWF@1.1:WorkFlowParticipant . Therefore the affected trigger of the customization point has also been renamed from

FSCGOVDLV@1.1001:CtxDeliveryResponseWFUser to FSCGOVDLV@1.1001:CtxDeliveryResponseWFParticipant . This will allow Process Participants to be determined more dynamically in the future

eGov15358

The SOAP actions FSCGOVXML@1.1001:SOAPFinalizeObject and FSCGOVXML@1.1001:SOAPDispatchObject have been adapted to so that the same validations are now performed as when the use cases are executed in the Fabasoft Webbrowser Client. This means that the use cases cannot be executed via SOAP if they cannot be executed via the Fabasoft Webbrowser Client and are acknowledged with a corresponding error message

eGov15364

In the query against the ZMR, the amendment to the Meldegesetz has been implemented and thus the following genders are supported in the query:

- Diverse
- Inter
- Open
- Not specified

If the new ZMR service is queried without this extension, the new genders will be ignored and the gender will not be filled in Fabasoft eGov-Suite (*Edition AUT*)

eGov15818

The extension of SOAP actions via a custom schema in the data node now works correctly again

eGov15799

Annotating and blackening is now possible even if the client's time zone is different from the server's time zone

eGov15802

When the Wirk Item "Print" was executed on several activities at the same time, an update problem occurred in the selection dialog. The problem has been fixed (*Edition CCA, Edition DEU*)

eGov15463

When importing encrypted e-mails via Outlook, it is possible to select whether the e-mails should be decrypted. The functionality is available in the context menu applications Deposit and Capture

eGov15816

When opening E-Mails (MIME) (FSCMIME@1.1001:MIMEObject) it is checked if the property "E-Mail Attachments Stored Separately" (COOMAPI@1.1:contentreduced) is set. If this is the case and the content of the e-mail contains a PDF then no attempt is made to combine the content of the e-mail with the attachments. Instead the PDF content of the e-mail will be opened

eGov15787

If a document is duplicated using an identical copy, the properties "Document State" (FSCFOLIO@1.1001:objdocstate) and "Processing State" (FSCFOLIO@1.1001:objdocstate) are also copied

4.2 Build 23.0.2.13.73 (August 18, 2023)

Release

5 Fabasoft eGov-Suite 2023 Update Rollup 1 (23.0.1)

5.1 Build 23.0.1.77.30 (October 23, 2023)

eGov15364

In the query against the ZMR, the amendment to the Meldegesetz has been implemented and thus the following genders are supported in the query:

- Diverse
- Inter
- Open
- Not specified

If the new ZMR service is queried without this extension, the new genders will be ignored and the gender will not be filled in Fabasoft eGov-Suite (*Edition AUT*)

eGov15359

The maximum file size of 40 MB specified by Governikus for sending to Mutli Messenger is checked during the sending process. An error is displayed if the file size is exceeded (*Edition DEU*)

5.2 Build 23.0.1.70.29

Internal build

5.3 Build 23.0.1.70.28 (July 21, 2023)

No changes

5.4 Build 23.0.1.60.27 (June 27, 2023)

eGov15376

A CSV migration from the properties "State" (CHPRECONFIG@1.1001:dtstate) and "Category" (CHPRECONFIG@1.1001:dtcategory) to the new properties "State" (EGOVTEMPLATE@15.1001:dtstate) and "Category" (EGOVTEMPLATE@15.1001:dtcategory) has been performed. This migration was not performed during the introduction of the object class "Definition" and is therefore now made up for (*Edition CHE*)

eGov15312

eGovForms is working correctly again

eGov15414

Fixed an error in the Signatureclient where the dialog was not closed correctly after executing a use case

eGov15282

Logging of SOAP requests and non-logging of RTR requests works fully again. Log files are named correctly depending on the type (SOAP or REST)

[eGov15361](#)

In the Splitview, the button "Open in New Window" is no longer available when using macOS as the operating system, because Fabasoft Folio Client does not support this feature on macOS

[eGov15419](#)

The properties "Login credentials for Mail-Import " (FSCVGOV@1.1001:emailcredentials) and "Path to import fileshare folder" (FSCVGOV@1.1001:fileshare) have been hidden for the end user. For security reasons, the settings may only be changed by administrators

[eGov15416](#)

If an error is thrown when generating the PDF overview, this error is no longer displayed in the overview, but the standard dialog: " Error during conversion. Please contact your system administrator.". This prevents security-related error messages from being read by the user

However, the actual error is stored on the object itself via a technical event. The administrator can then view and correct the error

[eGov15395](#)

When dispatching an Outgoing with SMTP, an error was fixed when a document contains a "." at the end of the name

[eGov15247](#)

On mobile devices (e.g. iPad or iPhone), an error was displayed due to a misbehavior when opening the overview of objects. This misbehavior has been fixed

[eGov15394](#)

The content of the Workflow Notification "Activity Was Taken Over" has been restored

[5.5 Build 23.0.1.21.22-26](#)

Internal builds

[5.6 Build 23.0.1.21.21 \(May 5, 2023\)](#)

Release

[6 Fabasoft eGov-Suite 2023 \(23.0.0\)](#)

[6.1 Build 23.0.0.246.64 \(October 20, 2023\)](#)

[eGov15364](#)

In the query against the ZMR, the amendment to the Meldegesetz has been implemented and thus the following genders are supported in the query:

- Diverse
- Inter

- Open
- Not specified

If the new ZMR service is queried without this extension, the new genders will be ignored and the gender will not be filled in Fabasoft eGov-Suite (*Edition AUT*)

eGov15335

When fixing annotations for PDF files whose coordinate origin does not comply with the PDF standard, the annotation will be positioned correctly. Previously, they were positioned incorrectly due to the different coordinate origin

6.2 Build 23.0.0.239.63

Internal builds

6.3 Build 23.0.0.239.62 (June 27, 2023)

eGov15376

A CSV migration from the properties "State" (CHPRECONFIG@1.1001:dtstate) and "Category" (CHPRECONFIG@1.1001:dcategory) to the new properties "State" (EGOVTEMPLATE@15.1001:dtstate) and "Category" (EGOVTEMPLATE@15.1001:dcategory) has been performed. This migration was not performed during the introduction of the object class "Definition" and has therefore been triggered now (*Edition CHE*)

eGov15361

In the Splitview, the button "Open in New Window" is no longer available when using macOS as the operating system, because the Fabasoft Folio Client does not support this feature on macOS

eGov15419

The properties "Login credentials for Mail-Import " (FSCVGOV@1.1001:emailcredentials) and "Path to import fileshare folder" (FSCVGOV@1.1001:fileshare) have been hidden for the end user. For security reasons, the settings may only be changed by administrators

eGov15416

If an error is thrown when generating the PDF overview, this error is no longer displayed in the overview, but the standard dialog: " Error during conversion. Please contact your system administrator.". This prevents security-related error messages from being read by the user

However, the actual error is stored on the object itself via a technical event. The administrator can view and correct the error

eGov15394

The content of the Workflow Notification "Activity Was Taken Over" has been restored

6.4 Build 23.0.0.227.60-61

Internal builds

6.5 Build 23.0.0.227.59 (May 10, 2023)

No changes

6.6 Build 23.0.0.226.58 (May 5, 2023)

eGov15308, eGov14995

The application "Open in New Window" can display overviews of mail merges. Previously the overview of these objects was not displayed

6.7 Build 23.0.0.226.57

Internal build

6.8 Build 23.0.0.226.56 (April 28, 2023)

eGov15279

If an activity was opened with an object instance to which no read permission existed, then an endless loop occurred. Subsequently, the activity view was not opened. The problem has been fixed

eGov15268

When submitting a Return Receipt to the FSCDLVCFM interface, the request could not be processed in a Linux system with a Tomcat 8 and a ClassCast error occurred. This error did not occur on Windows. The error in the Return Receipt transmission to a Linux system has been fixed (*Edition AUT*)

6.9 Build 23.0.0.210.54-55

Internal builds

6.10 Build 23.0.0.210.53 (April 11, 2023)

eGov15220

If the Delivery Notification from phase 2 is used for processing the Return Receipts, the status of the Return Receipt now remains "Delivered" if the delivery item has not been picked up by the recipient. Previously, the status was incorrectly set to "Not delivered" (*Edition AUT*)

eGov15221

The toolbar has been extended with the menu "Page Overview" (EGOVBASE@15.1001:MenuPageOverview)

eGov15163

In the Sample Conversion, the converted content can now be opened again via the button "Open". For this purpose, a separate link has been added in the view that opens the overview

6.11 Build 23.0.0.210.50-52

Internal builds

6.12 Build 23.0.0.210.49 (March 27, 2023)

eGov15154

The Admin action "Transfer column settings" has been adjusted to work again after activating the App "Customizing".

An empty app profile FSCORCONFIG@15.1001:CustomizingAppProfile has been added to App "Customizing" (FSCTEMPLATEMGMT@1.1001:AppTemplateManagement) so that the object classes from the software component FSCTEMPLATEMGMT are not automatically available for searching and creating after activating App "Customizing".

After activating the App "Customizing", when the user logs in for the first time all Ad Hoc Process Templates and Display Settings of the user are migrated to the user's "Templates and Presettings", which the user has created or for which the user is entered as owner. If the Standard ACL of the object class is not stored in the objects found or additional authorizations have been assigned via Change Access or Read Access, then these objects are stored in the new property "Not migrated Objects", which is visible in the "Templates and Presettings", if it is not empty.

The new bulk job FSCORCONFIG@15.1001:BulkMigrateCustomizingDisplayViews searches for View Settings with the property "Displayed Columns" (FSCTEMPLATEMGMT@1.1001:flddispcolumns) set and removes the entry with the property "All Properties" (COOSYSTEM@1.1:classallattributes) from the View Settings. That way the old form page for the View Settings is displayed again. Furthermore, for each property in "Applicable for" a row is created in the View Settings.

If a View Setting only has one row with the values "Object" and "All Properties" (COOSYSTEM@1.1:classallattributes) in the property "Applicable for", then no migration is performed because no property is available for a unique mapping.

The following changes have been made to "Templates and Presettings", "Collections for Templates and Presettings" and "Customizing Configuration":

- The menus "Create Template", "Create Process" and "Synchronize" are no longer displayed
- In the properties "Personal Presettings" and "Presettings" the property "Applicable for" is additionally displayed as a column
- In the context menu of "Collections for Templates and Presettings" the menus "Show New Events", "Register as", "Download" and "Duplicate" were removed
- In the context menu of "Collections for Templates and Presettings" the menu "PDF" was present twice, so it was removed once

The properties "My templates for ad-hoc processes" and "Prescription templates of my group" are hidden when the App "Customizing" is activated. The Ad Hoc Process Templates in the used Workflow Preferences are not removed, because after the automatic migration of the Ad Hoc Process Template after activating the App, the non-migrated objects are still available.

When a Group is created, the App "Customizing" is automatically stored within the Group.

When using the App "Customizing", only those Column Settings that were created for the current list are displayed when overwriting existing Column Settings.

With the new menu "Change assignment" (FSCORCONFIG@15.1001:MenuChangeAssignment), Display Settings and Ad Hoc Process Templates can be moved between "Collections for Templates and Presettings" and "Templates and Presettings". Mapping is also possible using drag and drop as well as copy and paste.

When moving, the following properties are available in the new assignment:

- "Changetype" (FSCORCONFIG@15.1001:changeassignment) indicates whether the original object or a duplicate is to be moved
- "Save in" (FSCORCONFIG@15.1001:fldsavestarget) indicates in which collection or personal preset the object should be saved. This property is only visible when assigned via the menu. All collections for presets to which the user has modification rights, as well as the user's personal presets are available
- "Use settings for all objects" (FSCORCONFIG@15.1001:useassignmentsettingsforallobjects) indicates whether the settings such as "ChangeType", "Save in" and approval are to be adopted for all subsequent objects. This property is only visible if more than one object is assigned

Remark:

In the Dashboard view, assigning objects using drag and drop to the properties "Personal Processes" and "Personal Presettings" is not possible. In this case, the menu as well as copy and paste can be used.

The following changes have been made to the display of the object class "Personal Presettings":

- The property "Personal Templates" is no longer displayed
- The menus "Show New Events", "Create Presetting" and "Create Process" have been removed

After activating the App "Customizing", the new View Settings are displayed in the search result.

6.13 Build 23.0.0.201.48 (March 17, 2023)

eGov15107

The ribbon application "Use Version" is available for selection if versions exist on the object. Previously it happened that the application was inactivated unintentionally

eGov15144

Department Administrators can import or create PDF and email objects on their desktop (*Edition AUT*)

eGov14765

The Task Pane menus "Copy" (COODESK@1.1:MenuEditCopyDirect), "Send Link" (FSCVENVUI@1.1001:MenuSendAsPointerDirect), "Properties" (COODESK@1.1:MenuOpenObjectAttributesDirect) and "Time Travel" (FSCTIMETRAVEL@1.1001:MenuManageTimeTravel) have been removed for objects of the Objectclass "Inbox". The menu "Move" (FSCVGOV@1.1001:MenuMoveToInbox) becomes visible only when for uses with more than a single inbox. The tab "Documents" (FSCVGOV@1.1001:inboxdocuments) has been renamed to "Captured incomings". The tab "Inbox" (FSCVGOV@1.1001:inboxcontents) has been renamed to "Documents to be captured". The menu "Cleanup Inbox" (FSCVGOV@1.1001:MenuCleanupInbox) has been removed, instead an automatic cleanup is triggered by adding or removing items from the tabs "Captured incomings" and "Documents to be captured" depending on the respective Inbox cleanup expressions. A new tab "Last Finished" (FSCVGOV@1.1001:lastfinisheddocuments) has been added for the Inbox, which lists the 100 most recent items that will be removed from the "Captured incomings" list by the automatic cleanup

eGov15123

Added a CSV migration for Fileplans (FSCVGOV@1.1001:CtxHomeFileplanRoot) and Inboxes (FSCVGOV@1.1001:CtxHomeInboxRoot) so that these widgets are still not visible after updating from version 2019 if they have been visible before updating.

After an update from version 2019, the Bulk Job FSCUIEXT@15.1001:MigrateHomeWidgetSettings must be executed to ensure that previously hidden widgets are not visible after updating

[eGov15143](#)

When evaluating the Profile of the dispatching organisation for Dual Delivery, Supergroups are considered (*Edition CCA, Edition AUT*)

6.14 Build 23.0.0.191.46-47

Internal builds

6.15 Build 23.0.0.191.45 (March 7, 2023)

[eGov14892](#)

The conversion from PDF to PDF/A [2/3]b now generates smaller files, previously it could happen that files grew in size exponentially

[eGov15077](#)

When transferring Outgoings to a Linked Domain, the "Individual Dispatch Attachments" (COOELAK@1.1001:addrindividualdispobjs) and "Decision for Addressees" (COOELAK@1.1001:dispobjs) are also transferred

[eGov15088](#), [eGov15043](#)

When working continuously in the worklist preview for a longer period of time, the rare behavior that the web service gets a stack overflow error no longer occurs

[eGov15074](#)

Closed files are taken into account during "Set SubjectAreas" (EGOVBASE@15.1001:MenuSetFileplanOnSubjectArea), as long as the property "Preserve closed files" (ELAKGOV@1.1001:preserveclosed) within the corresponding Subject Area is set

[eGov14983](#)

The enumeration type "Gender" (FSCFOLIO@1.1001:Sex) has been extended by the values "Open", "Inter" and "Not specified" (*Edition CCA, Edition AUT*)
The value "Diverse" has been removed from the enumeration type "Gender" (FSCFOLIO@1.1001:Sex) (*Edition CHE*)

[eGov15076](#)

When reorganizing, activities that are "Suspended" are also found

6.16 Build 23.0.0.191.40-44

Internal builds

6.17 Build 23.0.0.191.39 (February 23, 2023)

eGov15036

When navigating to the list view "Last Finished" of the inbox, the current list content is automatically updated. Previously, the list has only been updated after pressing the task pane menu "Refresh"

eGov14876

For testing the Governikus Data Aeonix implementation, the online test system of Governikus is used from now on

In addition, our implementation for the Evidence record and the Governikus Data Aeonix tests in general have been adapted to the test system (*Edition DEU*)

eGov15037

The menu entry „Open Teamroom Wastebasket“ (FSCDMS@15.1001:OpenTRWastebasket) in the task pane of folders is displayed only if the wastebasket of the parent teamroom exists

eGov15020

When delegating activity instances, an error message could occur if mandatory Work Items had not been performed yet. The problem has been fixed

eGov15052

When creating Time Intervals, Search Forms and Template Categories, they are no longer automatically stored in the Templates and Presettings

eGov15019

When undocking the overview in the Splitview of Documents, an object lock could occur if the view was previously switched from read to edit mode. The problem has been fixed

eGov15025

Direct import of documents into Register Sheets is possible again. Previously an error occurred (*Edition CCA*)

6.18 Build 23.0.0.172.32-38

Internal builds

6.19 Build 23.0.0.172.31 (February 7, 2023)

eGov14903

Objects that are marked for deletion are only available for further editing to a limited extent now. New objects can no longer be stored within objects that are marked for deletion. All corresponding (context) menu actions have been hidden. Adding via the property "Refers to" (COOELAK@1.1001:referrednumber) is not possible anymore

6.20 Build 23.0.0.162.29-30

Internal builds

6.21 Build 23.0.0.162.28 (January 27, 2023)

eGov14918

When using the "Templates and Presettings", when saving "Ad Hoc Process Template" the "Personal Presettings" respectively the "Collections for Templates and Presettings" are offered as location

eGov14926

The handling of return receipts from the Vendo delivery service has been modified so that it is now also stored when a delivery item was picked up. This return receipt is classified as P6 after a P11 return receipt (*Edition AUT*)

eGov14978

The menu "Update children" (EGOVBASE@15.1001:MenuUpdateSubjectAreaChildren) in the context menu of Subject Areas has been adapted as follows:

- After each treated subordinate object, the changes are applied immediately. This reduces the transaction size
- The execution of the menu is visualized with a progress bar
- The available "Properties" (EGOVBASE@15.1001:uscproperties) are immediately displayed in the dialog "Settings" (previously it was necessary to add them to the list first). By means of selection the desired properties can be compiled

eGov14985

The polling mechanism to the Vendo delivery service has been improved in the following points:

- It now handles each return receipt individually. This prevents the transaction from becoming too large
- Possible errors are now displayed better, which facilitates error analysis

(*Edition AUT*)

eGov14979

The Task Pane menu "Public Links" (FSCTEAMROOM@1.1001:MenuEditPublicAccessCTRLTeam) of Teamrooms is displayed regardless of whether public links exist. Previously, at least one had to exist

- The property "Public Links for This Object" (COOSYSTEM@1.1:objpublicaccess) and the menu item "Access Protocol" have been removed from the Formpage "Public Links"
- The feature to create Public Links to Teamrooms has been disabled

eGov14915

The Fabasoft eGov-Suite 2023 documents have been updated

eGov14989

The action "Validate Property" (FOLIOEX@15.1001:ValidateProperty) returns the value "true" if a Customization Point entry configured for this purpose does not return a value

eGov14874

Added a new action to verify a hash from the passed content or string with an existing hash. If the two hash values match the value true, otherwise false is returned

The action DEVEXT@15.1001:CompareHashes needs the parameters Content or String, the Hash Type and the hash to compare

eGov14796

In the "Basic Settings", the property "Show Advanced Properties for Activities" (COOWF@1.1:usrenvshowadvactivitiesprops) is available on the "Workflow" tab for administrative roles. When the setting is activated, additional information is displayed in the properties of an activity. Among others, the aggregate "Work Items" (COOWF@1.1:actinstwork) known from previous version is visible using this setting

eGov14925

The Formpage "Discussion" (EGOVBASE@15.1001:PageShowDiscussion) has been modified so that inserted images are also displayed in the property "Discussion entries" (COOELAK@1.1001:discussionentries)

eGov14971

Fixed a porting error when transferring the action COOELAK@1.1001:ResolveOUHierarchy from Java to Expression, which caused the return parameter "origin" to stop being filled

eGov14993

The default propagation of signatures (=propagation takes place according to the property "Propagated Modifications of Properties" of the respective object class) is deactivated

6.22 Build 23.0.0.137.19-27

Internal builds

6.23 Build 23.0.0.137.18 (January 9, 2023)

Release
