1.8 Build 24.0.0.134.4 (January 5, 2024)	6

1 Fabasoft eGov-Suite 2024 (24.0.0)

1.1 Build 24.0.0.196.15 (March 21, 2024)

eGov16332

The supporting search information in the task pane of the Mindbreeze search has been reduced by some items that are not in use

eGov16335, eGov16311

An error occurred when opening an activity in the tab "Deadline" that prevented it from being opened, has been solved

eGov16312, eGov16243

The Bulk Job "BulkMigrateInboxRootWidget" searches for User Environments in which the context "Inboxes" (FSCVGOV@1.1001:CtxHomeInboxRoot) in the property "Available Elements on Home" (FSCUIEXT@15.1001:defaultwidgets) is set and sets the context "Inbox" (FSCVGOV@1.1001:CtxHomeInboxObject) in the property "Available Elements on Home" (FSCTEAMROOM@1.1001:usrenvhomewidgetsettings) to "Visible" no

eGov16336, eGov16177

It is now possible to delete annotations with touch gestures (e.g. when using a stylus)

1.2 Build 24.0.0.196.14

Internal build

1.3 Build 24.0.0.196.13 (March 14, 2024)

eGov16237

If objects of different object classes (Subject Area, File , Subfile Collection or Document) are marked and re-assigned together, an error is displayed because a joint re-assignment is not possible

eGov16247

The check for object classes in the property "Required Businessdata" (ELAKGOV@1.1001:requiredbusinessdata) of Business Data has been adapted so that configurations are also possible with superordinate object classes

eGov16245

Due to an error, the associated addressee object could not be initialized during the CSV import of addressees. This error has been fixed

eGov16242

When calling web services via the Fabasoft Protocol Manager (FSCPROTOCOLMANAGER@15.1001) and using Basic Authentication, the flag "Add information on basic authentication as \"Authorization\" to the HTTP header" (FSCPROTOCOLMANAGER@15.1001:basicauthorizationasheadervariable) was added. Accordingly, if login information is to be added to the HTTP header during the web service call in the variable "Authorization", this flag must now be set explicitly.

Previously, the Authorization header was not set at all and some web services (e.g. PVP Stammportal in Austria) could no longer perform basic authentication

[eGov16246](#)

Due to an error, the filter was not executed in the context of the search for Business Data for Business Data of the type "Object Type" with a stored property "Filter for Business Data". This error has been corrected and the filter is taken into account

1.4 Build 24.0.0.181.10-12

Internal builds

1.5 Build 24.0.0.181.9 (February 15, 2024)

No changes

1.6 Build 24.0.0.170.8 (February 5, 2024)

[eGov13879](#)

The "Decision Template with Text Modules Component Object (Microsoft Word)" "RSa Return Receipt" (ATPRECONFIG@1.1001:RSaReturnReceipt) and "RSb Return Receipt" (ATPRECONFIG@1.1001:RSbReturnReceipt) have been updated. In the templates the new field "Address Rsa (ATPRECONFIG@1.1001:Anschrift_Rsa) as well as the new virtual properties "Zip Code and Department City" (ATPRECONFIG@1.1001:DepartmentZipCode_DepartmentCity) and "Street, Zip Code and Department City" (ATPRECONFIG@1.1001:DepartmentStreet_DepartmentZipCode_DepartmentCity) are used

Furthermore, the new object class "Documentgeneration" (COOELAK@1.1001:DocumentGeneration) is available. An instance of this object can be stored in Groups and Domains. In the object class, the property "Virtual Properties" (COOELAK@1.1001:documentgenerationdocproperties) can be used to define new "Virtual Properties", which subsequently are available in Microsoft Word documents

[eGov16138](#), [eGov16056](#)

When importing a file via GMM, the check to determine whether it is a normal XML file or an X-Rechnung is done much earlier than before, as this has led to unexpected behaviors

[eGov16054](#)

In the properties "Disabled Notifications" (FSCFOLIO@1.1001:usrevtignoredobjects) and "Receive Notifications about" (FSCFOLIO@1.1001:usrevtnotificationobjects) selected Content object classes can be used

[eGov15532](#)

To simplify error analysis with app.telemetry, several %%LOG entries have been added in the course of "Create Fair Copies" and Dispatch

[eGov16123](#)

Recognition of signed emails has been improved. If the rule with the trigger EGOVBASE@15.1001:CtxProhibitImportOfEncryptedEmails is set to true in a system, the recognition now works better and it is therefore more likely that a signed e-mail will

be prevented from being imported. In addition, the display of the error message has been improved in some import situations

eGov16127

The old shortcut definitions with & have been removed for the translations of the following languages:

- LANG_FRENCH
- SUBLANG_FRENCH_SWISS
- LANG_ITALIAN
- SUBLANG_ITALIAN_SWISS

1.7 Build 24.0.0.134.5-7

Internal builds

1.8 Build 24.0.0.134.4 (January 5, 2024)

Release
